PROFILE

A passionate front end web developer with a talent and desire for utilising a wide range of technologies to build elegant and functional websites and applications.

I believe the internet is the greatest thing ever developed by mankind and I am proud to contribute to it.

SKILLS

Technologies
HTML5, CSS3, Sass, Bem, Responsive Web Design, Javascript (ES6), ReactJS, React Native, Redux, React Router, Radium, NodeJS, jQuery, Ajax (XHR), Git, Bash, NPM, ESLint, Webpack, Grunt, Jest, Mocha, Selenium, MySQL.

Software
VS Code, macOS, iOS, Android, iTerm, GitLab, BitBucket, GitHub, Chrome, Firefox, Safari, Internet Explorer, JIRA, Azure, BrowserStack, MS Office, G-Suite, Postman, Crystal Reports.

EXPERIENCE

Front End Developer
LewisCodes Ltd
August 2018 - Present

Working as a freelance front end developer.

Front End Engineer
TheBeansGroup
March 2018 - August 2018

Working on the main studentbeans website across multiple markets worldwide, a white label version of the same website used by other world renowned brands, as well as some internal tooling.

Front End Developer
ASAP Compare (now RedBrain)
January 2018 - March 2018

Working on a multitude of sites that provide click through lead generation to online retailers; resulting in 1 million click throughs daily and 1 billion in annual sales revenue.

Front End Developer
Connect Group
October 2016 - January 2018

Working on three web applications for Jaguar LandRover; the main worldwide 'Digital Experience' websites (landrover.com and jaguar.com), the car configurator (currently being used to configure the Range Rover Velar and Jaguar E-Pace) and the Customer Portal (currently in Alfa testing).

Senior Business Analyst
Personal Touch Financial Services
June 2012 - October 2016

Working on the internal 'Toolbox' platform used by over 700 financial advisers.

PROJECTS

Crystal Clear Sourcing
ReactJS, Redux
August 2018 - Present

Tasked with designing and developing a front end for a mortgage sourcing app for brokers of complex mortgage products. The site is currently in the live testing phase. It will be rolled out to market on a subscription basis for other mortgage brokers throughout the UK. A large part of this project involved the creation of a product entry app, for inputting products available in the sourcing system in the most time efficient manner possible.

StudentBeans
ReactJS
March 2018 - August 2018

StudentBeans is a student discount platform used by thousands of students worldwide. Most of my time working on the project centres around the Single Sign On and user management aspects of the site; implementing changes required as a result of the GDPR legislation as well as general improvements to the user signup and verification process.

Jaguar LandRover Customer Portal
ReactJS, Redux, Sass, NodeJs
May 2017 - January 2018

I can't say too much about the Customer Portal as the project is still in the Alfa/Beta testing phase and so is currently embargoed. However, working on a brand new product enabled me to design and implement more high level aspects of the front end architecture as well as develop complex components.

Jaguar LandRover Configurator
ReactJS, Redux, Sass, NodeJs
January 2017 - May 2017

My time on the Configurator project was spent developing the 'Recommended Choice' functionality. This enabled different markets to set different configuration options as being the 'recommended choice', aiming to drive the customer towards a preferred configuration which they would then be able to purchase as is, or refine further.

Jaguar LandRover Digital Experience
HTML5, Sass, jQuery
October 2016 - January 2017

Development undertaken on the JLR sites, primarily on the retailer locator component. This involved a complete refresh of the component, bringing it in line with retailers requirements, as well as implementing a dynamic search option for the user.

EDUCATION

A-Levels
Shelfield Community Academy
September 2005 - June 2007

IT, Product Design, Music Technology, General Studies, Citizenship.

GCSEs
Shelfield Community Academy
September 2003 - June 2005

English Language, English Literature, Maths, Science (Double Award), Graphic Design, Music, Physical Education.

GNVQ
Shelfield Community Academy
September 2003 - June 2005

IT
